

# Customer focused, Results oriented.

## Who we are

DataPoint Services, LLC (DataPoint) is a small business joint venture comprised of 5 proven small businesses providing innovative enterprise information technology (IT) services and solutions to our Federal customers. DataPoint members include Indev, LLC, The Dalton Gang, Inc., PenBay Technology Group, LLC, The IQ Business Group, Inc., and PPT Solutions, Inc.

DataPoint is a provider of professional technology, engineering and business services focused on the Federal government. Our technical experts have supported a range of Chief Information Officer customers at the Department of Transportation (DOT), Department of Defense (DOD) and Department of Homeland Security (DHS), as well as private sector customers, delivering leading edge technology solutions such as Software as a Service (SaaS), Platform as a Service (PaaS), Data Management, and Cloud Enablement services. Recently, our joint venture supported a commercial customer to help develop and mature service offerings, including Emerging Technology Services (Artificial Intelligence/Machine Learning, Distributed Ledger Technology/Blockchain and Cybersecurity).

## OUR VISION

To be recognized as an innovative provider of high-quality business, technology, and systems engineering solutions delivered in the most challenging and complex situations.

## OUR MISSION

To deliver business, technology, and systems engineering solutions and services that are customer focused, quality driven and value priced.

## Our Company

As a provider of business, technology and engineering solutions services for all stages of the modern enterprise, from strategy and transformation planning to managed infrastructure services, DataPoint helps to successfully cope with today's business and technology complexities. Our solutions are developed from our diverse set of IT capabilities and services that form the foundation of our Joint Venture and are the core competencies of our professionals. This service diversity allows our teams to think strategically while offering disciplined approaches to solving complex challenges in the government marketplace.

We achieve efficiency and consistency by judiciously applying our CMMI-consistent and PMBOK based project management methodologies; not through cookie-cutter approaches that ignore project's distinct needs and nuances. This approach has resulted in continual success in increasingly complex initiatives. Through our successful Joint Venture Members, DataPoint is able to leverage industry certifications, business systems and clearances, such as, ISO 9001:2015, ISO 20000, and ISO 27001 certifications, Defense Contract Audit Agency (DCAA) approved accounting system, and Facility Security Clearance (FCL).

## Our Approach

Customer satisfaction has been the key to building successful and long-term partnerships with all of our clients. Our employees interact with our clients as a committed partner, serving as trusted business advisors embodying a sense of urgency, timeliness, and consultation with a focus on their goals and standards.

### Commitment to Quality

Every DataPoint employee takes responsibility for the quality of the products and processes on which they work. DataPoint's commitment to quality fosters long-term, trusted partnerships with its clients. We develop, refine, and follow the best management practices. We embed these approaches into client relationships to provide reliability, through effective, efficient, and repeatable processes.

### Objectivity

DataPoint employees exercise independent thinking and select the products, services, and solutions for clients based on merit alone. When making decisions, we maintain a balanced perspective that seeks a mutually beneficial solution for our clients, employees, and partners.

### Innovation

Supported by DataPoint's culture and refined processes, employees exemplify continuous renewal to constantly improve and develop our products, services, and processes. We value new ideas and an entrepreneurial approach at all levels, whether identifying an innovative tactical approach to a client challenge or undertaking a new strategic initiative for developing or enhancing DataPoint's core capabilities.

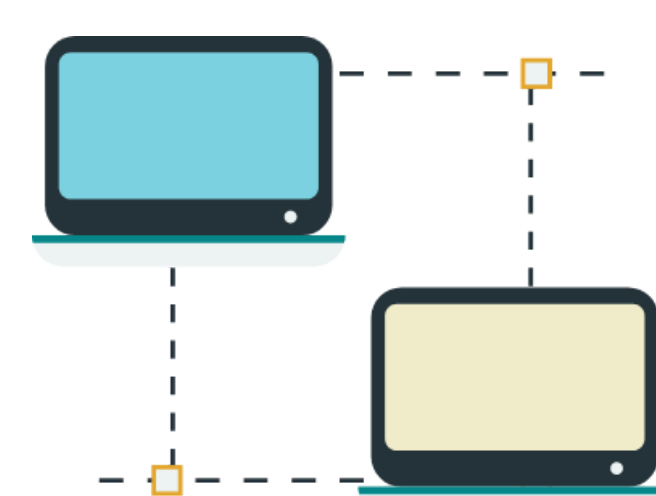

## Services

Technology has become integral to the business operations of the federal government in locations across the world. Advances in technology and its effective use are expected to continue to drive economic and social gains while enabling future innovation and growth. The management of distributed enterprise systems, the merging of legacy applications into modernized systems, and the evolution of the modern enterprise into a more agile and responsive entity requires the existence of well-designed and effectively managed technology infrastructures.

As a leading provider of business, technology and engineering solutions services for all stages of the modern enterprise, from strategy and transformation planning to managed infrastructure services, DataPoint's consultants help to successfully cope with today's business and technology complexities. Our solutions are developed from our diverse set of services that form the foundation of our organization and are the core competencies of our professionals. This service diversity allows our teams to think strategically while offering disciplined approaches to solving complex challenges in the government marketplace.
